TECHNICAL DATA SHEET

Multi Coating TextileGuard

PRODUCT INFORMATION:
Multi Coating TextileGuard is a textile impregnation that protects against water, dirt and stains caused by, among other things, drinks or food. This means that wet, damp or dry dirt will no longer be absorbed by the fiber. Water-containing products will bead off on the impregnated fiber surface. Multi Coating TextileGuard is a water-based nanotechnology product. The product is an intelligent anti-stain protection. It penetrates into every fiber with an invisible, UV-stable and diffusion-open layer. Appearance, structure and color are maintained. Multi Coating TextileGuard is designed to protect all synthetic and natural fibers.

AREAS OF USE:
All synthetic and natural fibers; from the finest silk to cotton, softshell (not varnished leather), cardboard/paper, canvas, cork, tent cloths, backpacks, hiking clothes/shoes, office furniture and suede etc.

INSTRUCTIONS FOR USE:
The surface must be clean and dust-free. Always test on a small area before full-scale application. Apply until the surface is well damp from the impregnation. Spray extra into seams, 2 applications provide extra protection, 10min. between each application. Curing time 8 hours.

CONSUMPTION:
6-25 m2/L

SAFETY:
Avoid inhaling spray mist.
